# About Me

I am a generalist tech-entrepreneur who designs and implements modern technologies, taking into account business processes and requirements. This puts me in a position to translate the goals defined by the Executive Board into concrete measures and to implement them holistically while complying with regulatory requirements. Internal and external stakeholders often refer to me as the "go-to person" for all technical issues. This enables me to build a resilient bridge between management and research/development, considering all respective needs. I am proficient in both traditional and agile project management methodologies, allowing me to flexibly address the needs of the teams that report to me. Continuous Integration, Continuous Delivery and Continuous Quality Improvement are not just buzzwords for me, but important tools tested in everyday life.

## What I Do

### Strategic Planning

Strategic planning is an organization's process of defining its strategy, or direction, and making decisions on allocating its resources to pursue this strategy.

### Project Management

Project management is the application of processes, methods, skills, knowledge and experience to achieve specific project objectives according to the project acceptance criteria within agreed parameters.

### Product Management

Product management is the role and function within an organization that is responsible for a product's overall success.

### Infrastructure Management

IT infrastructure management helps organizations manage their IT resources in accordance with business needs and priorities. Aligning IT management with business strategy allows technology to create value for the entire organization.

### Cyber Security Management

Information security management describes the set of policies and procedural controls that IT and business organizations implement to secure their informational assets against threats and vulnerabilities.

# Resume

## Experience

Jun 2024 – Present

TBA

TBA

Dec 2023 – May 2024

Hadean Supercomputing  
Ltd.

### Head of Product Subject Matter Expert

Hadean Supercomputing Ltd develops high-performance software solutions for complex computations and data-intensive applications. Its technologies enable companies to efficiently process massive amounts of data and solve complex problems in various industries including defense and entertainment.

# Myers–Briggs Type Indicator

The Myers–Briggs Personality Type Indicator is a self-report inventory designed to identify a person's personality type, strengths, and preferences. The questionnaire was developed by Isabel Myers and her mother Katherine Briggs based on their work with Carl Jung's theory of personality types.

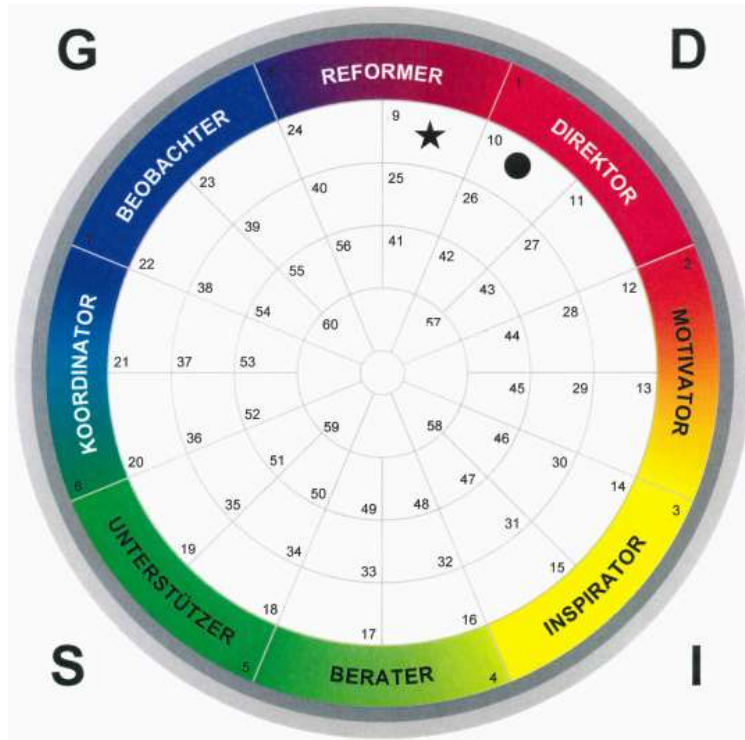

- E** – Extraversion
- S** – Sensing
- T** – Thinking
- J** – Judgment

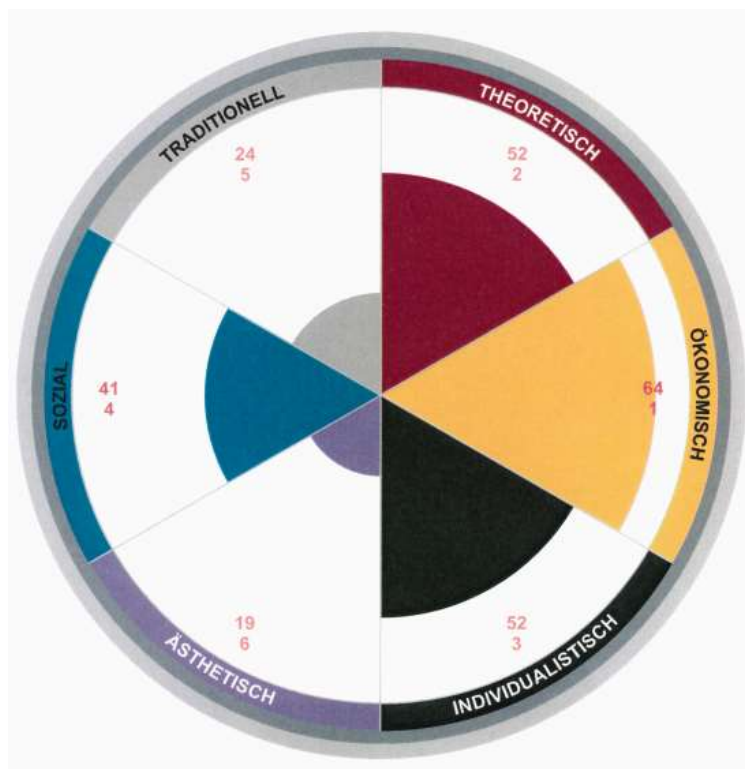

# MDI Insights Leadership-Check

MDI Insights Leadership-Check (also called TTI Insights Talent) is an analytical tool that comprehensively analyzes and explains human behavior and value preferences. It examines what we do, how we do something and why we do it.

Enclosed you will find excerpts from my test results. On request I will send you the complete test result, which is only available in German language.
