About Me

I am a results-driven tech entrepreneur and product leader, skilled at bridging the gap between business strategy and cutting-edge technology. My career focus: designing and implementing innovative technical solutions that align with complex business requirements, drive growth, and ensure regulatory compliance. Known as the "go-to person" for all technical matters, I build resilient connections across executive, product, and development teams—ensuring stakeholder needs are met at every organizational level.

With hands-on leadership in both agile and traditional project management environments, I translate executive vision into measurable action, supporting high-performing, cross-functional teams. For me, Continuous Integration, Continuous Delivery, and Process Optimization are not just industry terms, but proven, everyday practices for achieving scalable and sustainable results.

What I Do

Strategic Planning

Defining organizational direction, translating vision into actionable roadmaps, and allocating resources for maximum impact.

Project Management

Delivering projects on time and within scope using both agile and conventional frameworks, with a focus on collaboration, transparency, and measurable outcomes.

Product Management

Leading product lifecycles from ideation to launch, creating user-centric solutions that drive business value and meet market needs.

Infrastructure Management

Building and optimizing IT and cloud infrastructures to align technology with business strategy—maximizing scalability, security, and performance.

Cyber Security Management

Implementing comprehensive security frameworks and controls to protect digital assets, ensure compliance with regulations, and mitigate risks across the organization.

Resume

Experience

Director of Development

Massive Linx is a technology company specializing in the development of a web-based 3D engine and streaming platform. Originally designed for the entertainment sector, its cutting-edge technology is highly adaptable for use in a wide range of industries, enabling interactive real-time experiences at scale.

- Defined and executed the overall development strategy for the 3D engine and streaming solutions.
- Built and led interdisciplinary development teams, fostering a culture of innovation and technical excellence.
- Introduced agile development methodologies, resulting in improved team efficiency and delivery timelines.
- Coordinated cross-functional efforts between product management, engineering, and business development to align technology initiatives with company objectives.
- Oversaw technical architecture and implementation, enabling scalable deployment across various industry clients.

Head of Product
Subject Matter Expert

Hadean Supercomputing Ltd develops high-performance software solutions for complex computations and data-intensive applications. Its technologies enable companies to efficiently process massive amounts of data and solve complex problems in various industries including defense and entertainment.

- Defined and executed the business unit wide product vision and strategic roadmap.
- Led cross-functional teams, ensuring seamless integration of engineering, design, and marketing.
- Established KPIs to track product success and informed ongoing decision-making.
- Conducted market and user research to guide enhancements and user-focused improvements.
- Presented product strategy and updates to internal and external stakeholders, fostering alignment.

Technical Project Manager
Subject Matter Expert

Hadean Supercomputing Ltd develops high-performance software solutions for complex computations and data-intensive applications. Its technologies enable companies to efficiently process massive amounts of data and solve complex problems in various industries including defense and entertainment.

- Led multidisciplinary project teams to deliver technical solutions aligned with business goals.
- Facilitated collaboration between engineering and game development teams.
- Defined team objectives and performance standards, supporting continuous improvement.
- Integrated industry trends and emerging technologies into project planning and execution.
- Managed external partnerships and acted as principal contact for negotiations.

Jul 2007 - Dec 2023
MonKay.de

Managing Director

MonKay.de is an IT consulting firm delivering infrastructure solutions and digital transformation services for mid-sized and large organizations, with a strong commitment to not-for-profit digital enablement.

- Provided end-to-end consulting for IT projects, specializing in data center and provider selection.
- Oversaw implementation and ongoing operation of tailored IT infrastructures for clients.
- Launched and managed charitable digital projects for nonprofit organizations.
- Promoted sustainable and social business practices, balancing commercial and charitable goals.
- Built and maintained long-term client relationships through reliability and service excellence.

Jul 2019 - Apr 2022
